Digital Transformation, Industry 4.0 and Human Resources Management: Innovative skills to enhance HE students' employability, flexibility and transversal capabilities

About the project:

The project DigiWork focuses on the new digital working approaches that will be needed in Europe and that imply a real digital revolution in processes' management and competences. DigiWork objective is to identify and systemize relevant concepts on how the digital transformation and Industry 4.0 are affecting the European market, giving a possibility for HEIs to enhance their teaching curricula, and spread good practices and challenges for students and workers that want to improve their skills.

The project is targeted at:

- Students (from higher education institutions - HEIs)
- Researchers
- Teachers
- Entrepreneurs
- Unemployed people

Partner Meeting:

The first face-to-face project meeting was held in Bratislava, Slovakia on 05-06.05.2022. During the meeting, partners from Poland, Slovakia Bulgaria, Latvia, and Italy discussed the activities, expected results as well as, the next steps and deadlines related to the project implementation. The consortium partners discussed the progress and development of the national reports and good practices that are part of Result 1.
